

HYSTEROSALPINGOGRAPHY
Authorization for treatment addendum

Complications and consequences have been discussed. I understand that the risks include, but are not limited to, the following:

- Pelvic pain
- Infection
- Abscess formation, possibly requiring surgery such as hysterectomy
- Failure to make correct diagnosis
- Disruption of a current pregnancy
- "Vaso-vagal reaction" causing sweating, nausea, slow heart rate, and feeling faint
- Reaction to the contrast medium with itching, difficulty breathing or cardiopulmonary failure

I acknowledge that I have read and fully understand the above complications and risks, and that all of my questions have been answered to my satisfaction.
